

ALL IN ONE TRAMPOLINE - M08649 FOR CHILDREN AGED 3 TO 10 YEARS

WARNING:

Not suitable for children under
three years of age due to small parts.

SAFETY GUIDELINES

- For family and domestic use only.
- This product is intended for outdoor use only.
- Please read the instructions before use and retain for future reference.
- Ensure the trampoline has been assembled correctly as per the instructions in the manual
- It is essential that the intended site for this trampoline is completely flat and level. If the ground is uneven this will cause movement in the frame and could cause stress on the joined sections. Do not install over concrete, asphalt or any other hard surface.
- This trampoline is intended for use by children aged 3 to 10 years.
- DO NOT exceed the recommended MAXIMUM WEIGHT limit of 35 KGS.
- DO NOT allow more than one person on the trampoline at a time.
- Bounce only when the jumping mat is dry.
- ALWAYS wear socks when using the trampoline.
- ALWAYS wear glasses or helmets when using the trampoline.
- DO NOT wear footwear (eg shoes) when using the trampoline.
- ALWAYS remove jewellery before using the trampoline.
- ALWAYS jump in the middle of the trampoline bed.
- DO NOT fall or bounce on your knees, this can cause injury.
- DO NOT attempt or allow somersaults. Landing on the head or neck can cause very serious injuries.
- DO NOT allow other persons to go under, sit, stand or lie on the frame pads when the trampoline is in use.
- Remove any obstructions from beneath the trampoline.
- Children MUST NEVER use the trampoline unless supervised by a responsible adult.
- Ensure the trampoline is on level ground with a minimum of 2M clear space around the sides, 7M clear height space above and that nothing is under the trampoline.
- Mount and dismount the trampoline with care as injury may result.
- DO NOT use the trampoline in wet or windy conditions.
- IMPORTANT - You must not use the trampoline if you have a medical history of neck or back injuries or a mental or physical condition, these could cause injury.
- DO NOT use the trampoline if you have high blood pressure.
- Please read and refer to other warnings and use information in the instructions before using the trampoline.
- Use the trampoline only with mature, knowledgeable supervision.
- NEVER set up or continue to use the trampoline in heavy rain, wind or storms. It is recommended that the trampoline is taken apart and stored during bad weather.
- Only step on and off the trampoline, do not jump off or use the trampoline as a springboard.
- DO NOT allow children to take toys or other items onto the trampoline.
- DO NOT climb, swing or intentionally jump onto the panels or poles of the enclosure.
- Regularly check all nuts and bolts for tightness and tighten when required.
- Check all covering for bolts and strap edges and replace when required.
- Inspect all parts and fixings regularly for wear and damage - refrain from use if any parts or fixings are worn or damaged.
- In rain, bad weather and in the winter months cover the trampoline or dismantle and store indoors.
- WARNING - Keep away from fire.
- Design and specification may vary.

Made in China to European Standards

PARTS LIST

Contents Supplied

Ref	Description	Illustration	Qty
A	Main Frame		6
B	Safety Net bottom pole		6
C	Small Enclosure Foam Tube		6
D	Middle Enclosure Pole		6
E	Large Enclosure Foam Tube		12
F	Top Enclosure Pole		6
G	Connection Block		6

Fittings Supplied

Ref	Description	Illustration	Qty
H	Jumping mat		1
I	Bungee Cords		30
J	safety pad		1
K	Safety Enclosure		1

Tools Supplied

Ref	Description	Illustration	Qty
	Hex Key		1
	Spanner		1
	Bungee cord tool		1

L	Bolt M8 x 75 mm		12
M	Flat Washer		36
N	8mm Nylon Nut		24
O	Hex Bolt M8 x 50 mm		12

Before You Start:

Follow your trampoline instructions for assembly location and use. Ensure the trampoline is positioned sufficiently away from other items with the required clearances

IMPORTANT ensure the trampoline is located on flat level ground as failure to do this can damage the trampoline pole frame and legs and cause potential safety hazards

This trampoline should only be assembled by a responsible adult. Check the pack and make sure you have all of the parts listed

Please read the safety and usage instructions before use
Retain these instructions for future use

NEVER USE THE TRAMPOLINE WITHOUT THE ENCLOSURE PROPERLY FIX THE ENCLOSURE BEFORE EACH USE

STEP 1
Frame Assembly

Take the Main Frame (A) and using the connection blocks (G) (Round holes to face outward, hexagonal holes to face Inwards), take 2 x Bolts (I), 4 x washers (M), 2 x nylon nuts (N) and connect to the frame as shown in diagram. Repeat this a further 5 times until a complete circular frame has been constructed.

Ensure all nuts and bolts are securely tightened (do not over tighten).

STEP 2

As shown in the diagram attach the Bottom Leg Poles (B) to the Main Frame (A) using Hex bolts (O), Nylon Nuts & (N) washers (M). Repeat this step until all 6 bottom leg poles are in place. Ensure all nuts and bolts are securely tightened (do not over tighten.)

Now place the small enclosure foam tubes (C) over the bottom poles (B)

STEP 3

Lay out the jumping mat (H) inside the frame ensure that the warning label on the mat is facing upwards. There are a total of 30 loops around the edge of the jumping mat (H) and 30 pieces of bungee cord (I) to attach it.

You will see in picture a that the frame has been divided into sections, there are 5 loops per section. When attaching the black mat get into a sequence, attach one of the loops using the bungee cord tool for extra leverage (if required) and the next loop to be attached will be on the opposite section of the frame, (ie: from position 1 – 2, 3-4, 5-6) this makes the process of attaching the mat a lot easier.

STEP 4

Take the Blue Safety Pad (J) and place in position the attached elastic ties are fastened behind the the main frame tube and attached to the underside of the safety pad.

STEP 5

From the TOP of the enclosure, gather the netting downwards towards the bottom, you will reach the holes about 10 inches from the bottom of the netting, these holes are to be placed over the base poles so that the last 10 inches of the netting assumes a skirt like effect, the gathered part of the enclosure should be placed on the outside of the poles ready for the next step. Affix the ties on each leg and ensure that the net is lowered to the ground as per diagram

STEP 6

WARNING! Never use the trampoline without attaching the enclosure, properly fix the enclosure cover before each use.

Slide the large enclosure foam tube (E) over the middle enclosure pole (D). Then slide this assembly through one of the six middle loops of the enclosure net (K). Now slide the middle enclosure pole (D) over the end of the bottom pole (B) depressing the spring pin as shown in diagram a and making sure that this locking pin locates into the hole on the middle enclosure pole (D) as shown in diagram b. Repeat this step until all six middle enclosure poles (D) are in place, then slide down the large enclosure foam tube (E) until it meets the small enclosure foam tube (C)

STEP 7

Slide the Large enclosure foam tube (E) over the top enclosure pole (F). Then push the top of the pole (F) into the loop at the top of the enclosure (K), push the cords of the enclosure through the loop of the top enclosure pole (F) and tie a secure knot. Once the loop is securely on the pole, secure the pole (F) onto the middle enclosure pole (D) depressing the spring pin as shown in diagram a and making sure that this locking pin locates into the hole on the middle enclosure pole (D) as shown in diagram b. Repeat this step until the enclosure is secured onto all six enclosure poles.

STEP 8

By this step your trampoline and enclosure has been fully assembled. Prior to children commencing play on the trampoline, first check that all parts are secure and have been assembled according to the instructions and all nuts/bolts are securely tightened. Please read the following safety warnings and usage instructions before use.

CARE AND USE

Care & Use

- This trampoline must be assembled by an adult. It must be erected exactly in accordance with the assembly instructions. Enlisting the aid of a helper will make assembly easier. This pack may contain small parts and is not suitable for children under 36 months until fully assembled.
- Please take care during assembly as the manufacturing process can sometimes result in the occasional sharp edge and small pieces of waste metalwork. The use of gloves to protect your hands from pinch points during assembly is also recommended. Should there be any missing parts, the toy must not be used until replacement parts have been fitted.
- The trampoline must always be used in a well-lit area. Under no circumstances should it be positioned on a hard surface such as concrete or asphalt, unless the ground under the trampoline plus the recommended free space area is covered with a safety surface. Examples of suitable surfaces are grass, sand or a play surface intended for this use.
- HIGH WINDS - It is possible for the trampoline to be blown about by high wind. If you anticipate high winds, the trampoline should be moved to a sheltered location, or be disassembled.

Usage

- This trampoline is designed and made for family domestic use only within the recommended weight limit (35 kg). This trampoline is not intended for use outside of these guidelines. The user must remove footwear (shoes) before use. The user must wear socks when using the trampoline. Misuse can result in injury. Inspect the trampoline before use and always replace worn, defective or missing parts. The pads should always be fitted.

Supervision

- Children must always be supervised while they are playing on the trampoline and must be instructed not to use the trampoline in an inappropriate or hazardous manner.

Remember!

- Trampolines are rebounding devices which propel the user to unaccustomed heights and into a variety of body movements. Rebounding of of the trampoline, striking the frame or springs, or improperly landing on the trampoline mat (bed) may cause injury

Weather Conditions

- Special care should be taken as weather conditions change. In particular a wet trampoline mat (bed) is too slippery for safe jumping. Gusty or severe winds can cause jumpers to lose control. To reduce the chance of injury, use the trampoline only under appropriate weather conditions. In cold weather, tongues and lips can stick to metal-work at subzero temperatures. In warmer and sunnier weather, parts can become hot and the temperature should be regularly checked during play, especially metal parts.
- Many surfaces can become slippery during water play. Extra caution and supervision is required when combining water with other forms of outdoor play (e.g. paddling pools, aqua slides etc.).

How to Use Your Trampoline

- Always bounce at the centre of the bed. Bouncing near the edge of the bed can lead to injury. The frame pad is not designed nor intended to support the weight of the trampoline user. Do not step or jump directly onto the frame pad, uncing too. Stay low until you can control your bounce and land consistently in the middle of the bed.
- To regain control and stop your jump bend your knees quickly when you land
- BE SURE TO KEEP THE FRAME PAD IN PLACE TO COVER THE FRAME AT ALL TIMES.
- The frame pad is not designed nor intended to support the weight of the trampoline user. Do not step or jump directly onto the frame pad.
